

KUNJAN BHATT

AI Engineer Intern – MLOps – Full-Stack ML Developer

☎ +977 9768785577 ✉ kunjan.bhatt.k@gmail.com linkedin.com/in/kunjan-bhatt github.com/kunjan-bh

Summary

AI Engineer and MLOps enthusiast with hands-on experience in building, deploying, and scaling machine learning applications. Skilled in Python, Docker, FastAPI, Airflow, and MLflow with a strong focus on automation, reproducibility, and deployment. Passionate about creating production-ready ML systems and developing full-stack AI applications using React and Django.

Experience

Data Fellowship

Dec 2024 – May 2025

Sunway Student Representative Council (SSRC), Kathmandu

Data Science Fellowship Program

- Selected among top-performing students for a competitive Data Science Fellowship program focused on real-world analytics and AI applications.
- Enhanced proficiency in Python, data manipulation, and statistical modeling through project-based learning.
- Collaborated within a 5-member team to analyze complex datasets and derive insights, strengthening analytical and teamwork skills.

Projects

Phishing Site Detection MLOps Pipeline | *Docker, MLflow, Airflow, FastAPI, MariaDB*

Jun 2025 – Sept 2025

- Developed an end-to-end automated MLOps pipeline for phishing site detection with real-time monitoring and model retraining.
- Implemented ingestion, preprocessing, model training, and API deployment using FastAPI and Docker.
- Integrated MLflow for tracking and versioning, improving model reproducibility by 85%.

Stroke Prediction Using Stacking Ensemble Method | *Python, FastAPI, PyTorch*

Mar 2025 – Apr 2025

- Built a stacking ensemble model combining CatBoost, XGBoost, and LightGBM to handle imbalanced medical datasets.
- Achieved over 70% recall with advanced sampling, calibration, and model optimization techniques.

Semantic Image Search with Deep Learning | *Python, CLIP, Algorithm Design*

Aug 2024 – Nov 2024

- Implemented semantic image retrieval using OpenAI CLIP embeddings for contextual search.
- Designed a hybrid relevance-ranking algorithm improving search precision by 22%.
- Optimized inference time for production-ready deployment.

Education

BSc (Hons) Computer Science with Artificial Intelligence

Mar 2024 – Mar 2028

Sunway College, Kathmandu

Nepal

Computer Science (+2 Level)

Apr 2021 – Apr 2023

Uniglobe SS/College

Kathmandu, Nepal

Technical Skills

Programming Languages: Python, JavaScript, SQL

Frameworks: FastAPI, Django, React, Next.js

MLOps Tools: Docker, MLflow, Airflow, Redis, GitHub Actions, CI/CD Pipelines

Developer Tools: Git, GitHub, Figma, MariaDB, REST APIs

Other Skills: Data Analysis, Data Visualization, Automation, Cloud Deployment (Basic)

Certifications & Achievements

- **DAV Codefest 2025 – 2nd Place:** Developed an AI-driven automation solution under a 72-hour national hackathon.
- **ICT Award 2025 – Top 12 Semi-Finalist:** Recognized for *New Innovation in Healthcare* — honored among the top 12 national innovations for impactful use of technology in health services.
